Profile Summary

Motivated backend developer (Python, GO, AWS) in training with a background in translation and cross-cultural communication. After several years supporting NGOs and international organizations as an English–French translator, I am now building solid technical foundations in backend systems, networking, and programming. I bring a structured, detail-oriented mindset, strong analytical skills, and the ability to learn independently and deliver precise, reliable results, both in language and in code.

Career Objective

To contribute to a forward-thinking engineering team by developing reliable backend systems and scalable APIs. I aim to bridge human and technical communication, using my translation background and growing expertise in Python, Go, and cloud environments to build clear, maintainable, and impactful software.

Technical Skills

- Languages: Python, Go (in progress)
- Backend Concepts: HTTP, concurrency, file systems, data structures, algorithms, REST APIs (learning)
- Cloud and DevOps: AWS (Certified Cloud Practitioner), Linux/WSL, Git, Docker (learning)
- Tools: VS Code, CLI, GitHub, Trados Studio, Antidote, Microsoft Office
- Languages (spoken): French (native), English (fluent), Japanese (JLPT N3, preparing for N2 – Dec 2025)

Technical learning and projects

Boot.dev - Backend development career path (2024–present)

- Building real-world backend systems in Python, covering HTTP, networking, and concurrency.
- Developed a **static site generator** that converts Markdown files into HTML, improving understanding of file I/O and CLI design.
- Building an **HTTP server from scratch** to handle multiple client requests concurrently, learning threading and socket programming.
    - Implemented core HTTP request/response handling using sockets.
    - Practiced connection management, concurrency, and graceful shutdown logic.
    - Reinforced knowledge of protocols and system-level performance tuning.

Certificates

• AWS Certified Cloud Practitioner (2024)
• Python PCEP – Certified Entry-Level Python Programmer (2023)
• Harvard University (edX): Introduction to Computer Science, Introduction to Programming with Python (2023)
• CIOL Level 7 Diploma in Translation (UK) - January 2013

Professional Experience

Independent translator/revisor (English-French) - self-employed
2019 – Present | Remote / Japan

- Provided translation and revision services for NGOs, humanitarian agencies, and technology partners, ensuring precise and consistent communication across multilingual systems.
- Specialized in technical documentation, HR platforms, and digital learning materials.
- Managed end-to-end projects using CAT tools, version control, and cloud-based workflows.

Key Achievements:

- Translated 1M+ words across 200+ projects with consistent quality and client satisfaction.
- Improved document workflows through terminology databases.
- Collaborated with cross-functional international teams in fast-paced remote environments.

Education

Edvenn – France

- Master's degree in English to French translation (2018–2019)

Blaise Pascal University – France

- Bachelor's degree in foreign languages (2006–2010)
